

## ADAPTER'S

Self-closing valves as per IS: 8737 are having outlet connections as a plain collar diameter, which needs a specific device to connect threaded fittings of regulator/pig tails to these valves. Adaptors are used for these purposes. Each adaptor is fitted with non-return valve at the outlet side, which restricts the reverse flow through the outlet of adaptor.

Type	Working Pressure Range	Inlet Connection	Outlet Connection	Gas
	0.5 - 17 Kg/Cm <sup>2</sup>	To suit self closing valve of collar Dia. as per IS: 8737 R-1703 Ø 25.6 mm R-1711 Ø 19 mm R-1712 Ø 22 mm	21.8 X 14 TPI (L.H)	LPG
